

Rohit Agarwal

Software Developer | Backend & Fullstack

+91 6260529778 | 7407rohitagarwal@gmail.com | [linkedin.com/in/rohit-agarwal-a785ba222](https://www.linkedin.com/in/rohit-agarwal-a785ba222) | <https://github.com/rohitag02>

PROFESSIONAL SUMMARY

Final-year CSE student with hands-on experience building production-grade backend systems — including an AI SaaS platform (HireIQ) serving 500+ users and a real-time fraud detection engine with 97.8% ML accuracy. Proficient in Node.js, Python, PostgreSQL, and REST API design. Seeking a Software Developer role in backend or fintech.

TECHNICAL SKILLS

Programming: Java, Python, SQL, JavaScript
Backend: Node.js, Express.js, Flask, FastAPI, REST APIs, RESTful Architecture, JWT Authentication, WebSockets
Core Concepts: Data Structures & Algorithms, OOP, System Design, Distributed Systems
Databases: PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps: GCP, Docker, Vercel, Render, Netlify
Tools & Platforms: Git, GitHub, Linux, VS Code, PyCharm
Networking: TCP/IP Fundamentals, HTTP/HTTPS
Libraries: Pandas, NumPy, Scikit-learn

PROJECTS

HIREIQ — AI Resume Analyzer & Interview Assistant — *React.js, Node.js, Python, PostgreSQL, FastAPI* [GitHub](#) | [LiveDemo](#)

- Engineered AI-powered SaaS platform processing **500+** resume analyses using Python FastAPI and Google Gemini AI, with ATS score prediction, skill gap detection, and personalized improvement suggestions.
- Built secure Node.js REST API with JWT authentication (access + refresh tokens), Multer file upload handling, and PostgreSQL database using Sequelize ORM
- Deployed three-service microarchitecture — React frontend on Vercel, Node.js backend and Python AI service on Render, PostgreSQL on Neon — with automatic CI/CD via GitHub

UPI Fraud Detection & Risk Scoring Platform [GitHub](#) | [CustomerPortal](#) | [BankDashboard](#)

- Built real-time fraud scoring system using RandomForest + GradientBoosting ensemble via Flask microservice achieving **97.8%** accuracy and 0.963 AUC-ROC on **10K+** transactions
- Engineered Node.js REST API with rate limiting and graceful ML fallback architecture delivering **<10ms** scoring latency.
- Wrote **18 Jest unit** tests covering all fraud signal edge cases; designed PostgreSQL schema with indexes for 10M transactions/day scale
- Deployed dual-interface system — customer payment portal and bank ops dashboard with live monitoring and manual review queue

Real Time Collaboration App — *React.js, Node.js, Socket.io, MongoDB*

- Built real-time chat platform supporting 200+ concurrent users with Socket.io and MongoDB
- Reduced message delivery latency by 40% by replacing HTTP polling with persistent WebSocket connections
- Designed Scalable backend services with authentication and live notifications.
- Implemented JWT auth, user presence tracking, and live notifications with room-based access control

Education

VIT Bhopal University,
B.Tech in Computer Science and Engineering in Cyber Security & Digital Forensics | 7.51 CGPA

Bhopal, MP
2022–2026

Guru Teg Bahadur Public School,
CBSE 12th Standard | 89%

Durgapur, WB
2020–2021

St. Peter's School,
ICSE 10th Standard | 85%

Durgapur, WB
2018–2019

Certifications

- AWS Technical Essentials – AWS Training & Certification | Sep 2025
- GEN AI Using IBM Watsonx – IBM Career Education Program | Apr 2025
- IBM Cyber Security Analyst – IBM Career Education Program | Apr 2025
- Data Science & Machine Learning – Python, Pandas, Scikit-learn
